

Connecting to eduroam via Android

The following instructions apply to using the Eduroam wireless service on the Android.

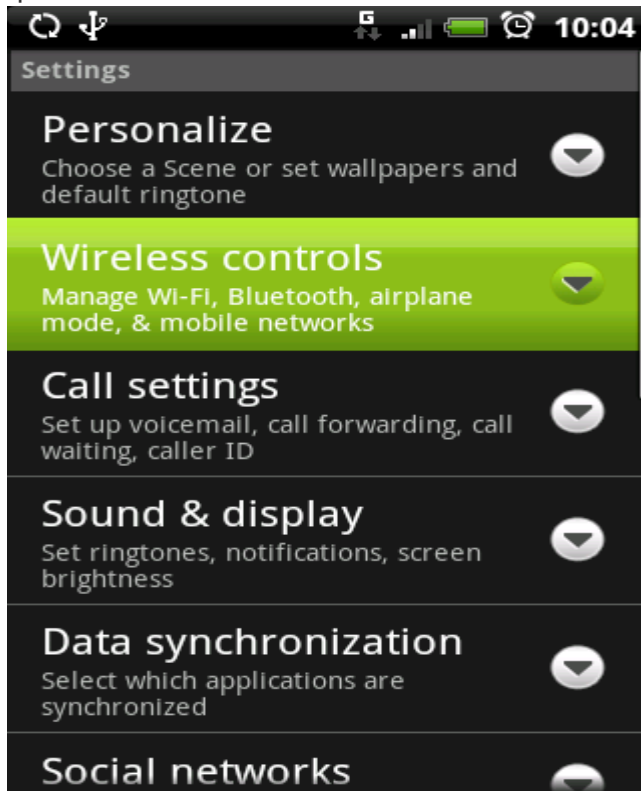

- From the home screen, tap the arrow to open the All Programs menu

- Tap Settings from the programs menu

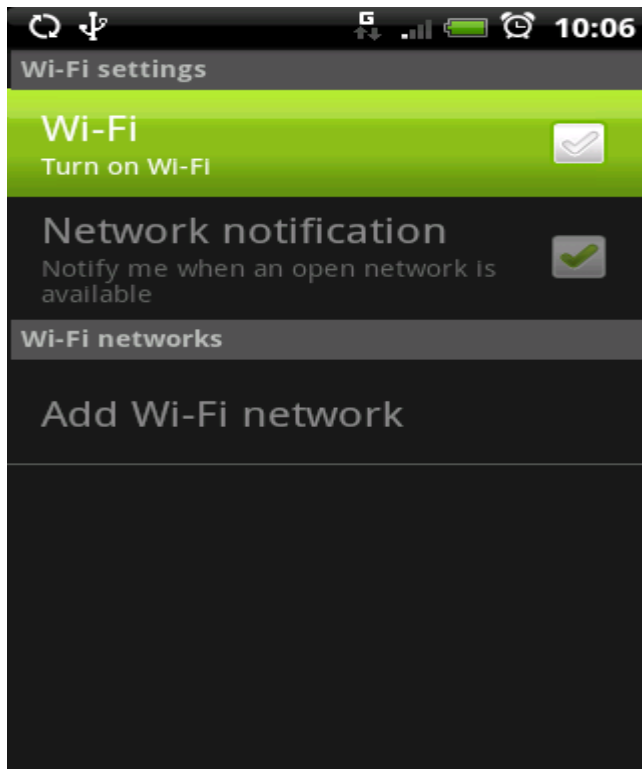

- Tap Wireless Controls

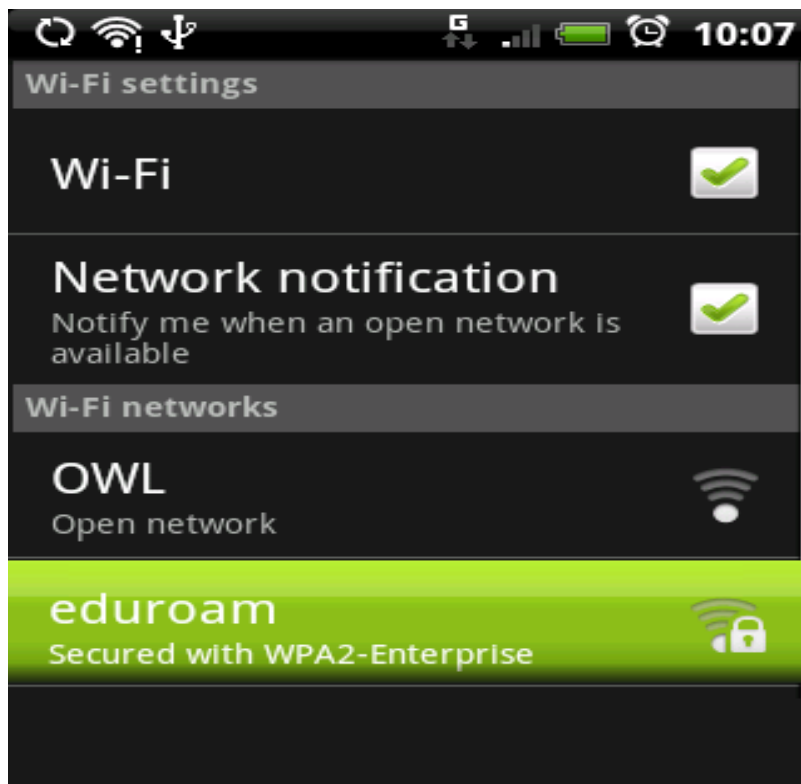

- Tap Wi-Fi Settings

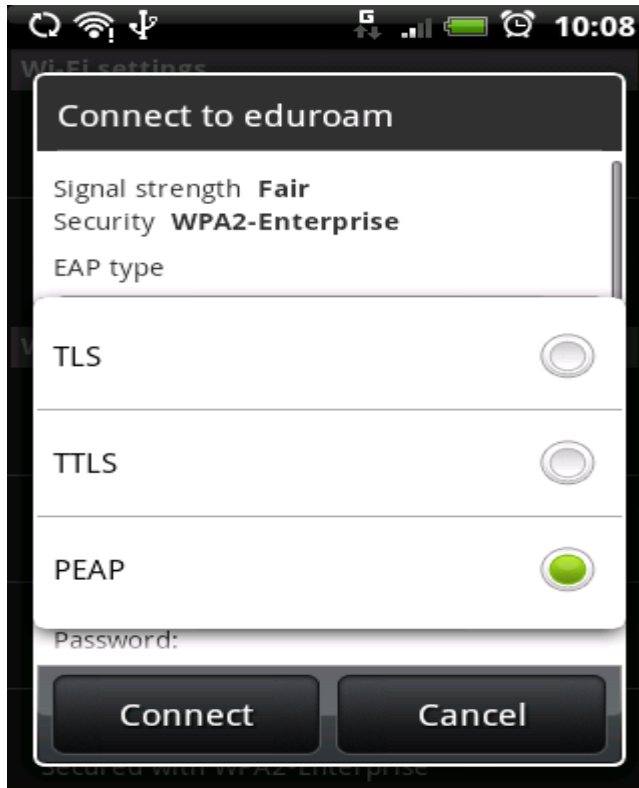

- Tap Wi-Fi to enable Wi-Fi support - the list of networks will become populated

- Tap the eduroam entry in the list

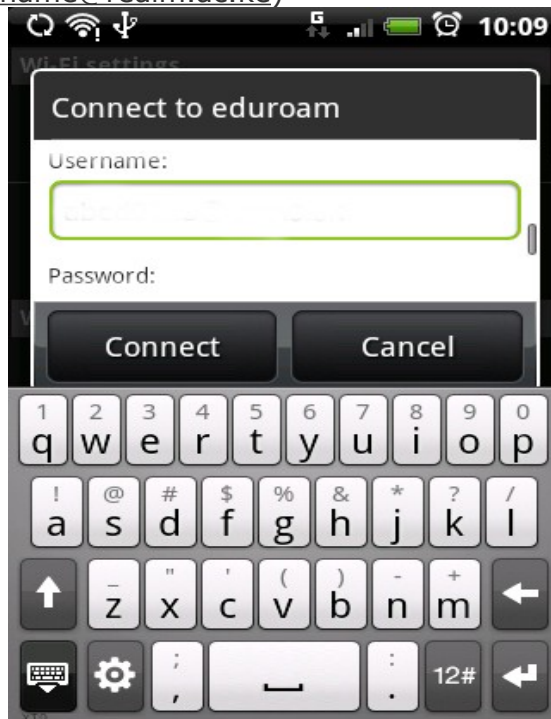

- Tap to change the EAP type to PEAP

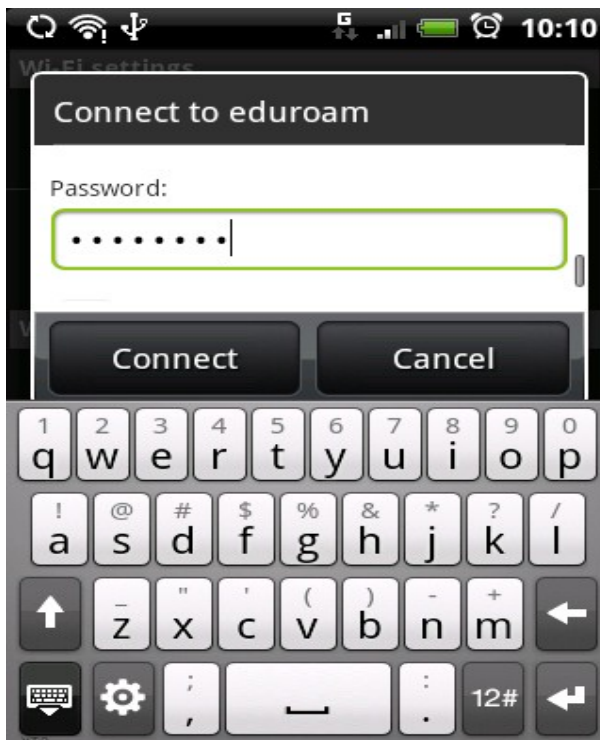

- Tap to set the Sub-type to PEAPv0/MSCHAPv2 (this ought to be the default)

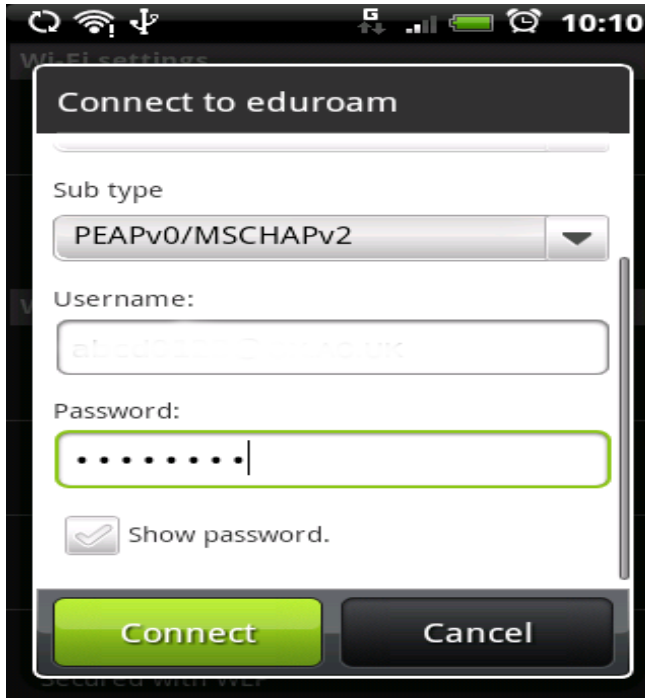

- Enter your username followed by @realm.ac.ke in the *User name* field (for example username@realm.ac.ke)

- On some mobiles you will also see an *Anonymous* identity box. Add in your Remote Access account username again followed by @real.ac.ke e.g. *username@realm.ac.ke*
- Enter your password in the *Password* field

- Hit the Connect button

- Wait a little while (up to about a minute) until the message "Connected to eduroam" appears

- A connection to eduroam will automatically be made in future if Wi-Fi is switched on and you are within range.
